---

## Skills

Generalist about frontend, backend, cloud. Comprehensive experiences in e-commerce and platform services with millions of users. Skilled in Java & Spring Boot, AWS, Typescript & React and AWS.

## Work Experience

---

### StyleShare / Commerce part backend engineer

MAY 2018 - PRESENT, Seoul

Styleshare is the most popular fashion SNS with commerce in Korea(5M+ users 2019). I developed various domains across commerce from cart, checkout, to accounting, etc. Build a new version system to migrate solution based legacy for scalability and reliability.

Skill: Java, Spring Boot, JPA/Hibernate / Docker & AWS / React, Typescript / Python, Flask

### Remember / Web application frontend engineer

JULY 2016 - MAY 2018, Seoul

Remember is the most popular business card management app in Korea (2.5M + users 2019). I developed the web version of Remember service. I participated in various projects such as chatting and social networking services, internationalization. I migrated code bases gradually from Angularjs(1.x) to react to loosen coupling and gain re-usability.

Skill: React, Redux, AngularJS(1.x) & Javascript / Ruby On Rails / Eelectron / AWS
